Minyahil T
SENIOR SOFTWARE ENGINEER
Email: m.danieltk@gmail.com   **Dallas, TX**

I am passionate about building scalable, secure, and user-friendly web applications using Java/Spring boot and Angular frameworks.

Objective

To obtain a challenging software Engineering position where my creativity, problem-solving skills, and experience and experiences in software development can be utilized to drive business objectives.

Experience

SENIOR SOFTWARE ENGINEER WELLS FARGO (Irving, TX)
June 2023 -
- Create and develop restful API using spring boot.
- Lead and coordinate a group of developers to develop Microservices APIs in agile environments.
- Collaborate with internal teams to resolve critical defects.
- Support production deployment and release activities.
- Hands on experience on Apache Kafka, Splunk, Jenkins.
- Implement unit testing frameworks (Mockito, JUnit, TestNG) to ensure code quality and reliability.

SOFTWARE ENGINEER T-MOBILE (Frisco, TX)
Oct 2020 – June 2023
- Develop and maintain an e-commerce platform using spring boot and angular frameworks.
- Hands on experience using AWS Lambda for server less API integration.
- Participate in teams that work on resolving critical defects involving legacy application that has a dependency issue.
- Coordinate with offshore team to support production releases.
- Used AWS Cloud Watch for monitoring API logs.
- Actively participated in code reviews, providing constructive feedback, and ensuring code quality.

SOFTWARE ENGINEER Infosys (Plano, TX)
Dec 2018 – Oct 2020

- Leveraged J2EE technologies (Java, JSP, EJB, JDBC) to build robust backend systems.
- Developed microservices using the Spring framework, including Spring MVC and Spring Boot, to create scalable and efficient applications.
- Hands-on experience implementation of IAM using SAML, and OAuth for secure authentication and authorization processes.

SOFTWARE Developer Provinity Inc. (Orlando, FL)
May 2018 – Dec 2018

- Development experience with Java 8, Spring boot, Spring Core, Spring MVC, Spring Security and REST Web Service
- Hands on Experience on Angular CLI (Command line Interface).
- Prepare and translate UX wireframes and mockups into responsive, interactive features, using Angular, HTML/CSS and JavaScript
- Build SPA (Single page Applications) using Angular 6.

SOFTWARE ENGINEER Lockheed Martins (Orlando, FL)
Mar 2017 – May 2018

- Prepare and translate UX wireframes and mockups into responsive, interactive features, using Angular, HTML/CSS and JavaScript.
- Supported and developed tools that automate the CI/CD and release activities.
- Write deployment scripts and configured Jenkins plugins for CI/CD process.

EDUCATION

MSC Computer Engineering – University of Maryland GC - 2022
BSC Computer science -- University of Washington - 2016

SKILLS

Web Development, Apache Kafka, Splunk, Spring Framework, REST API, Swagger, MongoDB, JPA(Hibernate), Microservice, Jenkins
